***Reissue Applications***

Claims 13 and 15-19, previously indicated as allowable, are now rejected.

An earlier presented recapture rejection had been dropped in view of the holding of *Eggert* in accordance with MPEP 1412.01-2 **"If the reissue claim recites a broader form of the key limitation added/argued during original prosecution to overcome an art rejection (and therefore not entirely removing that key limitation), then the reissue claim may not be rejected under the recapture doctrine. Ex Parte Eggert, 67 USPQ2d 1716 (Bd. Pat. App. & Inter. 2003) (precedential). For example, if the key limitation added to overcome an art rejection was "an orange peel," and the reissue claim instead recites "a citrus fruit peel", the reissue claim may not be rejected on recapture grounds."** The examiner based the analysis on the amendment to claims 1 and 3 of paper #8 amendment "A" (and others), which added the surrender limitation of the "angle being in the range of 95 to 120 degrees". It was viewed that this surrender limitation could be somewhat broadened, but not dropped. Unfortunately, the analysis omitted the consideration of claim 2, which had also been cancelled during that amendment. Claim 2 included "angle being in the range of 90 to 120 degrees", so the surrender limitation is the limiting of the end of the range from 90 to 95. Viewed in this respect, the entire surrender limitation has therefore been dropped, and in fact the limitation has gone beyond the cancelled claim range, as now the claim reads "angle being in the range of about 90 to 120 degrees", which constitutes impermissible recapture. **The oversight**

**of the portion of the analysis leading to the conclusion that a recapture rejection must be made is regretted.**

Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 08121657 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.

### ***Reissue Applications***

Claims 13 and 15-20 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the

Art Unit: 2871

patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Claim 13 has limitations in originally filed claims 1-2. During the prosecution of the patent, in paper #8, amendment A, claims 1 and 2 were cancelled in favor of an amended claim 1 which was identical to original claim 2 except for the change of the prism angle from "**range of 90 degrees to 120 degrees**" to "**range of 95 degrees to 120 degrees**". Therefore the range from 90-95 had been disclaimed. The current claim 13 has "about 90", which is in fact broader in respect to the recapture limitation than the cancelled claim 2. The amendment followed an art rejection by the examiner to claims 12, and the narrower range of 95 degrees to 120 degrees was then argued by applicant in the remarks of paper #13, amendment C. The limitation therefore was a surrender limitation, and the broadened claim 13 constitutes impermissible recapture, as the surrender limitation is not only completely omitted, but the cancelled claim is now broader than with respect of the surrender limitation.

### ***Allowable Subject Matter***

Claims 1-7 are allowed.
